### ORIENT STAR “WORLD TIME”

ORIENT STAR is an authentic automatic watch developed in 1951 based on the concept of “A Shining Star.”

ORIENT WATCH, with technology proven its 65 years of history and its sophisticated design, has developed numerous varieties of models including World Time and Retrograde. The ORIENT STAR series offers a lineup that includes GMT, Retrograde and other models of varying design styles that deliver value worth far more than their price and are winning great acclaim as men’s watches with high quality and high features.

ORIENT STAR WORLD TIME is the new perfect world-time watch for globally active business people.

Quickly check the local time in 24 cities around the world. To check the time in 24 cities on the globe whenever you like, just set the 24-hour-rotating ring that is interlocked with the hour hand to the city where you are. The watch has useful functions for business use, including a power reserve indicator for checking the remaining stored energy and a date hand.

The 41.5-mm-wide simple case enjoys a versatile design that can be used on or off duty.

The mirror-finished surface created by the Sallaz polishing technique beautifully shines and also produces an exclusive look. In addition, the glass is treated with a super anti-reflective (SAR) coating that blocks 99% or more of the reflection of light. This contributes to such excellent visibility that you may not even notice the presence of the glass.

The specially designed model using diamond-like carbon (DLC) to protect the bezel from scratches, giving a sharp and sporty impression.

The model offers the pleasure of owning a mechanical watch, with the dynamic actions of the movement visible through the case back, and three lines with solid, three-dimensional links masking the polished surface.
